

Equalities Targets

The Governors and Practitioners of Histon Early Years Centre have undertaken an equalities audit; our objectives for 2018-2021 are:

- To help all children, specifically boys, to develop their language skills and sustain their task involvement by supporting them in small, focused activity sessions. We will maximise targeted areas of interest, which in turn will ensure continuity of support for all our learners to realise their full potential.
- To offer all stakeholders the opportunities to extend their understanding, appreciation and respect for the cultural heritage of those from different socio-economic, religious and ethnic backgrounds. We will achieve this target by sharing stories, images and information; to better inform our knowledge and awareness.

2019-20 Equalities Statement

- For staff to work together implementing ways of supporting children who attend Histon Early Years Centre who speak languages other than those spoken by our staff.
- To focus on how we implement visual support and signing in children's early stages of learning to settle children, help them to understand basic rules and routines and establish a good learning platform for their future educational achievements.
- For staff to make strong relationships with parents of children speaking languages other than English (where language is a barrier) as they do with parents that speak English.
